

Electric heater DROP

DROP heater is inspired by the purest elements in nature - a water drop. Its round design softens and livens up the angular interior of a classic sauna, giving it a touch of elegance.

But DROP isn't only about the looks. This compact wall-mounted heater can actually fit up to 55 kg of stones, exceeding most wood-burning stoves and guaranteeing long-lasting steam.

ALSO REQUIRED:

- Stones
- Control unit

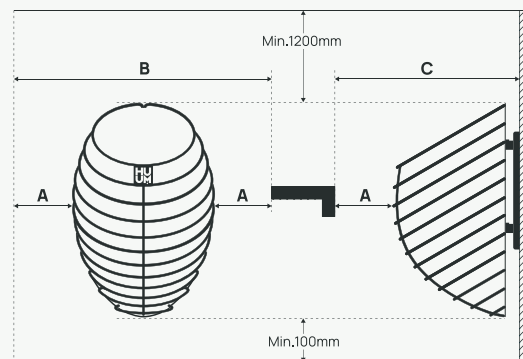

OPTIONS:

- Air tunnel
- Safety railing
- Embedding flange

*In the case of a 230 1N connection, an analogous connection is made to the 3-phase. The heating circuits must be connected before the circuit breaker.

** In case the heater is installed near combustible material and necessary safety distance cannot be guaranteed, use a heat reflector to reduce the safety distance by half.
